

# Limit Inflation in Old Age function for a Target Income

04/14/2026 2:08 pm EDT

The Limit Inflation in Old Age feature allows advisors to cap target income at a specific age, creating a smoother transition in spending rather than a sudden reduction. Below is a hypothetical example of using the limit inflation in old age starting at age 80.

## Client Information:

- John Doe, age 76, birth date: 01/01/1950, already retired

## Incomes:

- Social Security (SS): \$24,000 COLA 2.8%
- Pension: \$48,000 COLA 2.8%

## Assets:

- ROTH 401(k): \$1,600,000, Conservative 2% net growth per year
- Traditional IRA: \$350,000 Conservative 2% net growth per year
- Taxable Brokerage Account: \$2,000,000, Conservative 2% net growth per year

## Goals and Objectives:

- Target Income: Will start at \$120,000 with an inflation factor at 2.8%. At age 80 limit the target income for the remainder of the lifespan.
- Traditional IRA: In retirement years, withdraw the amounts to meet the yearly RMDs amounts.
- ROTH 401(k): In retirement years, withdraw the amounts to meet the yearly RMDs amounts.
- Taxable Brokerage Account: Contribute any excess amount for the remainder of the plan. Withdraw from the account to help meet the target income.

## Expenses:

- Gifting to family: \$12,000 remainder of the plan
- Charitable Contributions: \$6,000 remainder of the plan

SIPS provides other shortcuts to more accurately forecast spending as your clients age. Below is a list of helpful articles:
