IRMAA Tables by Coverage Year

Use these tables to check the IRMAA amounts SIPS shows on the Structured Income Plan. Find the coverage year, then find the highest tier whose MAGI threshold is exceeded by the household's MAGI from two plan years earlier (use the Single column for single filers and the Joint column for joint filers). A MAGI exactly equal to a threshold does not reach that tier.

The monthly amounts are the IRMAA surcharges only. They do not include the standard Part B premium or the client's Part D plan premium. The annual amount is the Total Monthly amount for 12 months, rounded to the nearest dollar. If a client turns 65 mid-year, SIPS charges only the months of Medicare eligibility.

Coverage years 2025 and 2026 are published figures. Coverage years 2027 through 2066 are projected from 2026 using growth rates maintained by PlanScout, so they will differ from the amounts CMS publishes each year.
